## MULTIFEED-TOP FILLING KIT

### FOR MULTIPLE SOAP DISPENSER INSTALLATION

Stern's Multifeed top filling soap dispenser kit is the ideal solution for heavy usage areas. Our multifeed system includes a 5 liters tank and supplies soap to up to 6 soap dispensers simultaneously. Top filling mechanism with cover and lockable top button in high quality chrome plated finish. Can be used with Stern's wall or deck mounted soap dispensers.

- Easy to install
- High quality PVC clear tubing
- 5 Liter soap container
- To be used with up to 6 soap dispensers

## SOAP DISPENSER REMOTE CONTROL

As Stern's soap dispensers are installed in different locations with different project requirements, changing the soap dispenser settings is imperative.

Stern's soap dispenser remote control allows changing the following settings:

The 1-4 drop keys allow the user to choose the desired soap quantity.

① 0.2 to 0.4 cc ② 0.7 to 0.9 cc ③ 1.2 to 1.6 cc ④ 2.1 to 2.3 cc\*  
Indication: continues blinking of the red light in the sensor eye.

\* The exact soap dosage depends on the soap viscosity.

This function allows coming back to soap quantity factory settings. Press the ADJ button.

Indication: 2 blinks of the red light in the sensor eye.

This function is ideal to perform any kind of activity in front of the sensor without operating the system (for example, cleaning).

The soap dispenser will remain shut for 1 minute when this button is pressed once. To cancel this function and to return to normal operation press the On/Off button again or wait 1 minute.

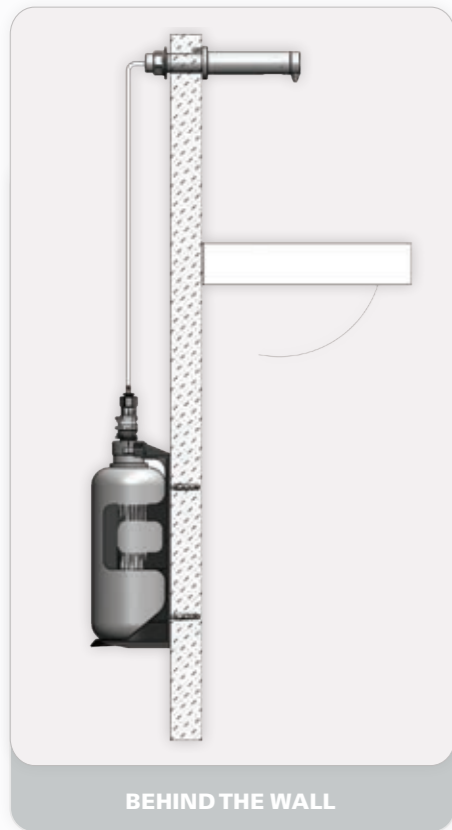

Indication: OFF – 2 fast blinks, ON – 4 fast blinks.

Once the soap in the soap tank reaches the bottom line at the soap tank, it should be refilled. To do so, unscrew the soap tank from the pump assembly and fill in the liquid soap up to the top line.

Screw the soap tank back to the pump assembly and make sure the tank is secured firmly in place.

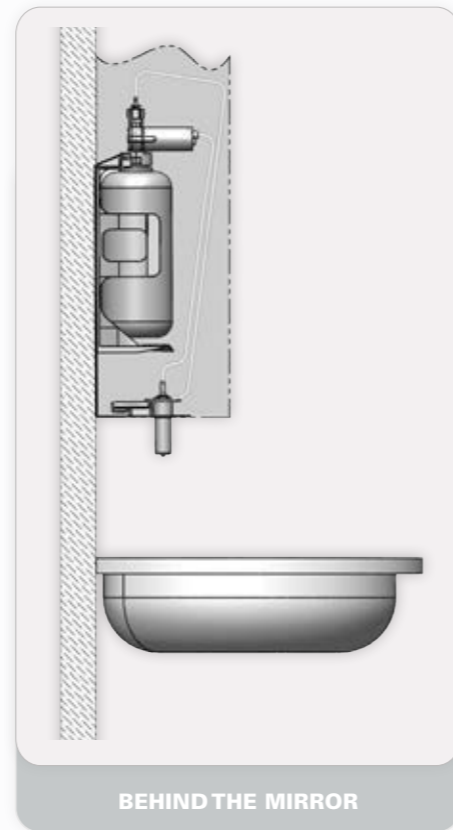

Press the FILL button. The pump would work for one minute in order for the soap to start coming out of the soap dispenser spout.

### A GERM FREE AUTOMATED ENVIRONMENT

Good hand washing is still an important key in fighting the spread of germs anywhere. Electronic faucets allow users to wash their hands without touching the faucet. This eliminates a potential source of cross contamination and spread of germs by contact with the faucets handles. Soap bars and manual soap dispensers are still potentially contaminated surfaces.

Stern has extended its product range with deck and wall mounted touch free soap dispensers. The result is a perfect combination, completely germ free and automated environment at public, residential restrooms or kitchens.
